CIRCUIT SOLUTIONS, INC. (CSI) is a technology company incorporated with a vision to provide low-cost, high performance, electronics-based systems that present the highest value to our customers. Its mission is to have “excellence and technology” pervasive in all their products and to continue to innovate and respond to ever-changing needs of the market.

In January 1996, CSI began full operations by offering CCTV Monitoring and Surveillance Systems, and Electronic Article Surveillance (EAS) Systems, commonly referred to as anti-shoplifting systems. It has since evolved and diversified into other product lines not only for the retail market but also for the security and electronics industry.

Over the years, CSI has continued with its rock-solid commitment to market only quality products and to provide excellent customer service and technical support. This combination has resulted in CSI making substantial inroads in the different markets the company has ventured into.

CSI greatly values the customers as this represents the collective vote of confidence that these companies have given CSI. For its part, CSI continually strives to improve all services provided to every customer.

Over the next few years, CSI will be launching several other products. Although these products may vary, there will be one common denominator - the highest possible product and quality service at the lowest possible price.

PRODUCT LINES:

- **Closed Circuit Television (CCTV)**
 - Analog Camera and DVR
 - 960H Stand Alone Digital Video Recorder
 - Analog High Definition Cameras (AHD)
 - High Definition Serial Digital Interface (HDS DI)
 - High Definition Composite Video Interface (HDCVI)
 - IP Cameras and Network Video Recorder
 - Tribrid PC-Based Digital Video Recorder
 - Wireless System Design
- **Electronic Anti-Theft System**
 - Benefit Denial Tags & Antenna
 - Electronic Display Protection System
 - Maelisa Library System
- **Access Control**
 - Proximity Readers
 - Biometric Readers
 - Finger Vein Readers
 - Lift/Elevator Controller
 - Single/Multi-Door Controller
 - Proximity Cards and Door Locks
 - Bollards and Turnstiles
- **Parking System**
 - Parking Guidance System
 - Parking Management System
 - Boom Barrier
- **Structured Cabling**
- **Guard Patrol System**
- **Video Intercom and Paging Systems**
- **Contract Design and Engineering**
 - Vehicle Tracking System
 - Freezer Monitoring System
 - Queuing System
 - Wireless Telemetry
